

“Rustproof and Human-Friendly”  
pure titanium bearings for various special environments

**SMT**

**1T Series**  
**Pure Titanium Bearings**

## ◎Features

### 1. Corrosion Resistance

Usable in severer corrosive environment than austenitic stainless bearing made of AISI304, by using high corrosion resistant pure titanium class 2 for outer and inner rings.

### 2. Safeness

Human-friendly without allergen reactions, as usable as in artificial joints.

### 3. Low Temperature Characteristics

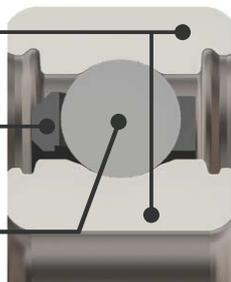

Usable in low temperature environment by good low-temperature toughness.

## ◎Materials

Outer and Inner Rings:  
Pure Titanium Class 2

Retainer:  
Fluorine Resin

Balls:  
Silicon Nitride Ceramics

## ◎Applications

Food Machinery, Seawater-related Equipment, Plating Machine, Electronic Device, Equipment used in Low Temperature, Etching Equipment, Developing Machine, Medical Equipment, etc.

## ◎Sizes Available

Please contact SMT for the available sizes.
